

# NINJA SHADOW WARRIOR REPLACING BUTTON FOR MOUSE

Green & Red Wires on button are for light  
Black & White Wires on button are for momentary switch

Ground and Voltage Wire for  
light bulb. (Green or Red)  
Polarity doesn't seem to matter for the bulb.  
Furthest left is Ground.  
Third from the left (where the Pink Wire from the  
button is attached) is Voltage.

**\*\*Make sure you pull wires of button through  
front of cabinet first, before  
you solder to mouse!**

Please solder the 2 button wires (Black & White)  
To these Soldering points.

Disregard this wire. (you can just cut this wire)
